# Electrical Adhesive Tapes Thermal Class B (130°C)

## Polyester Adhesive Tapes

(No stock item)

**Properties:** Standard product for many general applications.

Adhesive is elastic, and relatively and has Very good adhesive strength also on thin wires, good resistance

against resins and varnishes.

Dielectric strength: 5000 V<sub>eff</sub>

**Applications:** Interwinding or ground insulation, final binding of coils.

Main number	Base material	Colour	Thickne	ss [mm]	Adhesive
Wallinalise	base material	Colour	without adhesive	with adhesive	Adriesive
EK10966 🔊	Polyester	yellow, brown, transparent, blue	0.023	0.060	acrylic

UP 10 listed

**Properties:** Relatively hard adhesive, withstands even high shearing stress after curing and

resins and varnishes. Tape is suitable for protecting of exterior winding layer.

Dielectric strength: 5000 V<sub>eff</sub>

**Applications:** End binding for coils, interwinding or ground insulation, transformers

Main number	Base material	Colour	Thickne	Adhesive	
Maiii iluliibei	aiii iiuiiibei — base materiai		without adhesive	with adhesive	Adriesive
EK10140 💫	Polyester	yellow, transparent yellow	0.023	0.055	acrylic
EK10145 💫	Polyester	yellow, transparent yellow	0.050	0.080	acrylic

UL 510 listed

**Properties:** Stable, tear-resistant polyester tape. Good adhesion on enamelled wires,, also for

small coils, excellently compatible with all usual commercial impregnatingresins

Dielectric strength: 10000 V<sub>eff</sub>

**Applications:** Coil bindings for electric motors, phase and end winding insulation

covering coil end edges, identification and insulation in one step

Main number	Paca material	Colour	Thickne	ss [mm]	Adhasiya
Main number	Base material	Colour	without adhesive	with adhesive	Adhesive
EK10160 🗫	Polyester	yellow, transparent	0.023	0.055	acrylic
EK10165	Polyester	yellow, transparent	0.053	0.085	acrylic

**91** Ul 510 listed

Item number: Example: EK10966/006.0

EK109660 = main number/006.0 = width in mm

## **Polyester Adhesive Tapes**

(No stock item)

**Properties:** Very strong polyester tape with high initial

adhesive strength. Thicker insulating film causes

improved dielectric strength

Dielectric strength:  $7500 \, V_{eff}$ 

**Applications:** Traction relief and interlayer insulation

Main number	Base material	Colour	Thickness	Adhesive	
Walli Hullibel	base material	Coloui	without adhesive	with adhesive	Adriesive
EK10240	Polyester	yellow / transparent	0.036	0.07	acrylic

**Properties:** Soft adhesive, excellent adhesion on thin wires, good compatibility with

impregnating agents

Dielectric strength: 5000 V<sub>eff</sub>

**Applications:** Core and interlayer insulation, coil insulation

Automatic processing facilitated by smooth withdrawal from roll.

Main number	Pace material	Colour	Thickness	[mm]	A dhaciya
	Base material	Colour	without adhesive	with adhesive	Adhesive
EK10260	Polyester	beige	0.023	0.065	rubber

**<sup>9</sup>** UL 510 listed

# Polyester Adhesive Tape, fringed

(No stock item)

**Properties:** Offers greater security because of its fringing on both edges which ensures

complete insulation of the spools ends

Dielectric strength: 5000 V<sub>eff</sub>

**Applications:** Core and interlayer insulation, automatic processing

Main number	Base material	Colour	Thickness	[mm]	Adhesive
Maiii iidiiibei	Dase material	Colodi	without adhesive	with adhesive	Adriesive
EK10262	Polyester	white	0.023	0.05	acrylic

**Item number:** Example: EK10240/006.0

EK10240 = main number/006.0 = width in mm

### Polyester Shrinking Adhesive Tape

(No stock item)

**Properties:** Shrinkage by thermal effect, good resistance to

solvents; adhesive side can be printed on

Dielectric strength: 6000 V<sub>eff</sub>

**Applications:** Very high flexible insulation e.g. for windings in

electric machinery and equipment

Main number		Paca material	Colour	Thicknes	ss [mm]	Adhesive
Main nun	nber	Base material Colour without adhesive with adhesive		Adriesive		
EK11766	<i>9</i> .1	Polyester shrinkable foil	colourless	0.030	0.055	acrylic

U 🕦 10 listed

## Laminate Polyester / Polyester Fleece Adhesive Tape

(No stock item)

**Properties:** Polyester fleece has good cushioning effect, improved tear strength

Dielectric strength: 5000 V<sub>eff</sub>

**Applications:** Phase insulation, end bindings

Main number		Base material	Colour	Thickn	ess [mm]	Adhesive
		Dasc material		without adhesive	with adhesive	Adriesive
EK16100	<i>11</i> 2	Laminate polyester/ polyester fleece	white	0.060	0.130	rubber

UL 510 listed, flame retardant

# Laminate Polyester / Polyester Fleece Adhesive Tape

(No stock item)

**Properties:** Like **EK16100**. but thicker, with improved mechanical stability and increased

dielectric strength, acrylic adhesive. Tape also is available in widths from 1 to 3

mm to provide air and leakage distances in coils.

Dielectric strength: 6000 V<sub>eff</sub>

**Applications:** Insulating solder points, end bindings in coils

Main number	Paco Material	Colour	Thickne	ss [mm]	Adhasiya
Main number	Base Material	Colour	without adhesive	with adhesive	Adhesive
EK16101	Laminate Polyester/ Polyester fleece	white	0.150	0.230	acrylic

Item number: Example EK11766/006.0

EK11766 = main number /006.0 = width in mm

### Laminate Polyester / Glass Cloth Adhesive Tape

(No stock item)

**Properties:** Extremely tear - resistant tape with good cushioning

properties, flexible, withstands short periods of high temperature thanks to the glass cloth; good initial adhesive

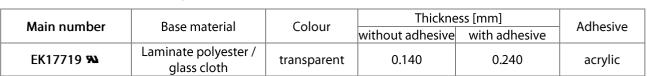

strength also on uneven surfaces.

Dielectric strength: 6000 V<sub>eff</sub>

**Applications:** Tear- and impact-resistant bindings for motors and

transformers, mechanical protection at wire edges and

uneven points.

UL 510 listed

### Laminate Polyester / Crêpe paper Adhesive Tape

(No stock item)

Properties: High dielectric strength due to the polyester foil, extremely tear and impact-

resistant, good absorption of impregnating agents, high adhesive strength.

Dielectric strength: 6000 V<sub>eff</sub>

**Applications** Motor and transformer industry, covering soldering and welding points, endwinding

band.

		6.1	Thicknes	s [mm]	
Main number	Base material	Colour	without adhesive	with adhesive	Adhesive
EK18100 🗫	Laminate polyester /	-l :-	0.200	0.265	rubber
EK18102 🕦	impregnated crêpe paper	chamois	0.200	0.265	acrylic

**UL510 listed** 

## Nomex® / Glass Cloth Laminate Adhesive Tape

(No stock item)

**Properties:** Extremely robust laminate made from saturable Nomex® with fibreglass reinforcement.

Extremely high power reserve even in the event of fault.

Dielectric strength: 2000 V<sub>eff</sub>

**Applications:** motor and transformer industry

Main number	Base Material	Colour	Area weight [g/m²]		Adhesive
Maiii iiuiiibei	base Material	Coloui	substrate	total	Adriesive
EK19708	Laminate /Nomex®- glass cloth	chamois	170 ± 10 %	310 ± 10 %	acrylic

### Filament Reinforced Polyester Adhesive Tape

(No stock item)

**Properties:** Because of reinforcement by glass fibres well suitable for bundling. Resistant

to transformer oil.

Dielectric strength: 5000 V<sub>eff</sub>

**Applications:** Motor and transformer industry

Main number	Paco material	Colour	Thickness	mm]	Adhasiya
Main number	Base material	Colour	without adhesive	with adhesive	Adhesive
EK86709	Polyester filament reinforced	colourless	0.120	0.170	acrylic

**Item number:** Example: EK86709/006.0

EK86709 = main number/006.0 = width in mm
