

This polyester shrink tape is woven from 100% polyester silk with fixed edges. The non-elastic textile tape is characterised by high mechanical strength and abrasion resistance, even at elevated temperatures. This makes it suitable for use in Class F applications in combination with a suitable resin.

Polyester shrink tape 0.18 mm thick

Specifications

Material:
Polyester shrink tape is woven from 100% continuous, undyed polyester silk with solid edges

Temp. Class:
F (155°C)

Shrinkage:
approx. 9% at 160 ˚C

Thickness:
0.16-0.18 mm nominal, 0.22 mm at the tape edges

Weave:
Twill weave

Packaging:
Inner core diameter of the roll: 55 mm
